I am Midhun Lal V.S, also known as Midhun Sunil, a passionate technology enthusiast with a strong foundation in Computer Science, specializing in Artificial Intelligence and Machine Learning. After graduating in 2023, I embarked on a dynamic professional journey, beginning as an Assistant Manager in Digital Sales at Kotak Mahindra, where I honed my skills in digital transformation and customer engagement.

My career then took an exciting international turn as I became a Master Trainer in AI and Data Science at a leading Singapore-based MNC. In this role, I played a pivotal part in developing and deploying AI-driven solutions while mentoring global talent in cutting-edge AI and data technologies.

Fueled by an entrepreneurial spirit, I founded Coding Monks Innovations LLP, a forward-thinking venture dedicated to providing AI-based solutions, cybersecurity services, and strategic technology advisory. At Coding Monks, I lead a talented team in delivering innovative, data-driven solutions and robust digital security frameworks that empower businesses to thrive in an AI-driven world.

I am also deeply committed to sharing knowledge and fostering collaboration in the tech community. As a Kaggle Notebook Expert, I achieved an impressive best-ever rank of 2209, and I have been recognized as a LinkedIn Community Top Voice in AI, Computer Vision, and Machine Learning. These milestones reflect my dedication to advancing research, mentoring future tech leaders, and contributing to the global AI ecosystem.

Driven by innovation and a vision for a smarter future, I strive to make a lasting impact through technology and leadership.
